Equine Consulting Services

Equine Consulting Services is a nutritional consultancy that works with clients to promote the health and performance of horses through nutrition.

Our clients include trainers and breeders as well as spelling and pre-training operations. Principal consultant, Dr Caroline Foote has extensive experience in both equine research and the equine industry with a Ph.D. from the University of Sydney, in addition to a Masters degree in Applied Science and a Bachelor Degree in Agricultural Science with Honours.

Broodmare and Growing Foal Nutrition

Our stud farm service focuses on ensuring feeding programs complement the individual farm environment to ensure broodmare and growing foal's requirements are adequately met.

Our goals are threefold: to optimise growth, reduce the risk of skeletal disease and increase the likelihood of the foal achieving it's potential to perform.

OUR FARM NUTRITION SERVICE INCLUDES:

- Scheduled farm visits (typically quarterly)
- Analysis of dietary intake of broodmares and foals relative to requirements
- Ration formulation
- Pasture and feed testing
- Specialised feeding programs
- Supplement service (optional)
- Customised formulations

Our objective is to give breeders, owners & trainers peace of mind knowing their horses are receiving optimal nutrition year-round.

Racehorse Nutrition

Racehorses have high and specific requirements which change throughout a horse's development and preparation. Feed quality and consistency also plays a large role in feed efficiency and acceptance of the ration.

After extensive evaluation of racehorse requirements, we have developed our own feed formulation program to ensure rations are balanced, giving horses every opportunity to perform to their full potential.

OUR RACEHORSE NUTRITION SERVICE INCLUDES:

- Stable visits as required
- Analysis of stable feeding program
- Analysis of individual rations relative to bodyweight and workload
- Reformulation and simplification of rations
- Feed testing where applicable
- Development of consistency between spelling, pre-training and racehorse feeding programs
- Specialised feeding programs
- Feed cost analysis
- Supplement service (optional)
