

# **NOURISH-EQ<sup>®</sup>** **NUTRITION SERVICE**

Anyone can balance a diet.

But it takes years of research and experience to understand how horses respond to different feeds, and how different feed types can be used to optimise the health and performance of horses.

Developed by Dr Caroline Foote (Equine Consulting Services Pty Ltd), our Nourish Nutrition Service has come about after years of research into the nutritional needs of horses. The service focuses on tailoring feeding programs according to the needs of the individual horse or stable.

## **What's involved?**

You simply start by submitting your horse's feeding program online to us (or for larger operations, we can come to you).

We will then contact you for further information about your horse. Do you have any specific concerns? Are you looking for extra energy or condition without the "fizz"? Does your horse have a health concern? Or do you just want to simplify the feeding program?

We will then work with you to create a ration for your horse(s) based on the most suitable commercially available or raw feed material and using our Nourish-Eq<sup>®</sup> formulations to balance the rations as required.

## **How do I start?**

Simply [click here](#) to access our online form, or [contact us](#) for further information.

## **Testimonial**

We have used Caroline's expertise for years. We use the Nourish-Eq<sup>®</sup> PLUS JOINT formulation, which in combination with our feeding program gives us peace of mind knowing the horses are getting what they need while performing to their full potential without having to use multiple supplements – BRETT & MEL PARBERY
